Email : sudershan@cmu.edu
Phone : +1-412-706-4634

Research Interests

My research interests lie at the intersection of **systems, applied artificial intelligence and machine learning (AI/ML), the Internet of Things (IoT), and health** domains. Specifically, I specialize in **building large-scale, deployable sensing systems** for smart environments and **developing foundation machine learning models** for human activity recognition and various health and well-being applications.

Education

Carnegie Mellon University — Pittsburgh, US
Doctor of Philosophy in Computer Science - Societal Computing — *Aug 2018 – Aug 2024 (expected)*
Advisor: Yuvraj Agarwal
Thesis: "Towards Enabling General-Purpose Sensing Systems"
Committee: Yuvraj Agarwal (Chair), Chris Harrison, Mayank Goel, and Anind K. Dey

SRM University — Chennai, India
Bachelor of Technology in Computer Science and Engineering — *Jun 2012 – Jun. 2016*

Research Experience

Carnegie Mellon University — Pittsburgh, US
Graduate Research Assistant — *Aug 2018 – Present*
Advisor: Yuvraj Agarwal || Collaborator(s): Chris Harrison and Mayank Goel

Building a General-Purpose Sensing Infrastructure || Paper(s) : P.1, P.4, P.6 || www.mites.io

- Developed Mites.io, a full-stack multimodal sensing platform to provide high-fidelity sensing of various ambient environmental facets. Built hardware and firmware, achieving accurate sub-second event capture with real-time edge processing. Architected a fault-tolerant distributed backend using Node.js and Python with dynamic load balancing, low latency data streaming, storage, and seamless over-the-air firmware updates.
- Implemented edge ML approaches for speech filtering in audio-based activity recognition to preserve privacy.
- Led the deployment of 300+ Mites devices in the CMU building, serving 400+ occupants and enabling applications such as space utilization, energy management, and activity tracking, establishing one of the largest IoT infrastructures.

Production-scale Machine Learning Platform for the Internet of Things || Paper(s) : P.2

- Developed MLIoT, a scalable ML platform automating model training, optimization, and serving for IoT applications using user- and application-driven policies. Engineered the system to adapt to IoT environments, diverse data sources, and compute resources, outperforming Google TFX by 50%-75% in accuracy with reduced latency.
- Explored foundational models using unlabeled multimodal sensor data to capture temporal relationships.

Understanding Activity Contexts for Wellness Applications || Paper(s) : P.5 || Github

- Implemented TAO, a framework leveraging OWL-based ontology and temporal clustering for detecting the context of an activity. Achieved near-ground-truth accuracy in wellness metrics for productivity and stress assessment.

Carnegie Mellon University — Pittsburgh, US
Research Associate — *Jan 2016 – Aug 2018*
Advisor(s): Yuvraj Agarwal, Anind K. Dey and Raj Reddy

Safe and Secure Building Operating System || Paper(s) : D.1, D.2, D.3 || buildingdepot.org

- Implemented BuildingDepot, a distributed building OS with features for sensor data storage, access control, and actuation with a robust RabbitMQ-based stream processing. Managed the deployment of IoT test beds at CMU and Google, using the OS as middleware, and created IoT apps for the GIoTTO project (iotexpedition.org).

National Internet Exchange of India (NIXI) and SRM — Chennai, IN
Researcher — *Dec 2013 – Dec 2015*
Advisor(s): D. Narayana Rao

- Created a cluster-based search engine tailored for Indian websites, enhancing search functions for local users ( ).

Selected Awards and Honors

CMU CyLab Presidential Fellowship 2023

Best Demo Award, Systems for Energy-Efficient Buildings, Cities, and Transportation Conference 2020

Teaching Experience

Teaching Assistant, Carnegie Mellon University Pittsburgh, US
17-334/734,05-436/836,19-534/734 Usable Privacy and Security (Undergraduate & Graduate) *Spring 2024*
Teaching Assistant, Carnegie Mellon University Pittsburgh, US
17-422/722,05-499/899: Building User-Focused Sensing Systems (Undergraduate & Graduate) *Spring 2020*
Teaching Assistant, SRM University Chennai, India
CS 238: Introductions to Computer Networks *Spring 2015*

Technical Skills

- **Programming Languages**: Python, C, C++, Java, HTML, CSS, Javascript, Node.js, Vue.js, D3.js
- **Machine Learning Frameworks**: TensorFlow, PyTorch, Keras, Scikit-learn
- **WebFrameworks/Databases**: Flask, FastAPI, Streamlit, Nginx, Gradio, MySQL, MongoDB, InfluxDB

Selected Invited Talks and Presentations
